

CyberMinds Product Sheet

AI Personas for Cybersecurity, powering the next-generation SOC.

CyberMinds introduces a new layer of intelligence inside CYBERQUEST: four specialized AI Personas built to

elevate every role in the SOC. They help turn noise into clarity, data into decisions, and daily pressure into faster

investigation workflows.

What CyberMinds Adds

- Technical depth for analysts who need context, guidance, and repeatable investigation support.
- Business insight for risk leaders who need concise, prioritized, impact-aware summaries.
- Operational speed for SOC teams managing constant streams of alerts, telemetry, and incident evidence.

AI Personas

The Mentor

Guides analysts through alerts, detection logic, investigation workflows, and documentation. Built for

onboarding and strengthening team fundamentals.

The Forensic Investigator

Reconstructs incidents, correlates evidence, identifies attacker movement, and supports IOC extraction for

threat intelligence workflows.

The Risk Advisor

Translates technical findings into business risk, prioritizes what matters, and generates executive-level

summaries for decision makers.

The SOC Analyst

Supports real-time alert analysis, suspicious activity investigation, and clear incident reporting for high-

pressure SOC operations.

Best Fit

CyberMinds is designed for SOC teams, DFIR teams, risk managers, and security leaders who need faster understanding, stronger decisions, and more consistent investigation outcomes inside CYBERQUEST.
